List of tables, figures and source codes	7
Introduction	9
1. Theoretical foundation for corporate financial health prediction	13
1.1. Life cycle of businesses.....	13
1.2. Financial health of a company	15
1.3. Diagnostic of financial health	19
1.4. Trends in Slovak economic environmen	23
1.4.1. Tools and methodology of financial analysis ex ante for corporate financial distress prediction.....	25
1.4.2. Selected tools financial analysis ex ante for corporate financial distress prediction and their evolution	34
2. Methodology for development of variant corporate financial health models	44
2.1. Data for development of variant financial health models	44
2.1.1. Dataset for the period 2002 – 2004.....	44
2.1.2. Dataset for the period 2009 – 2010 with alternative definition of corporate financial distress	46
2.1.3. Dataset for the period 2009 – 2013.....	47
2.2. Mathematical and statistical methods and software tools for development of variant corporate financial health models.....	48
2.2.1. Linear and quadratic discriminant analysis	48
2.2.2. Logistic regression and penalized logistic regression.....	49
2.2.3. Decision tree.....	51
2.2.4. Random forest	53
2.2.5. RE-EM trees.....	53
2.2.6. Neural networks	57
2.2.7. Model aggregation	57
2.3. Criteria for evaluation of classification models and interpretation of their ability to classify	58
3. Variant financial distress prediction models	67
4. Software for modeling of corporate financial distress	94
Conclusions	109
