

CONTENT

INTRODUCTION	7
1. THEORETICAL BASELINE OF PRODUCTION MANAGEMENT DEVELOPMENT	11
1.1. Determination and content of Production management	12
1.2. The task of pre-manufacturing processes in Production management.....	16
1.3. Classification of manufacturing processes in Production management.....	25
1.4. Description of post-manufacturing and cross-manufacturing processes	39
1.5. Organizational and technological innovations in production management.....	42
1.6. Sample of intelligent technologies for empirical research	46
1.7. Industry 4.0 and development of production management using intelligent technologies	54
1.8. Summary of theoretical baseline	61
2. APPLICATION OF INDUSTRY 4.0 IN THE SAMPLE OF INDUSTRIAL PLANTS: AN EMPIRICAL RESEARCH	63
2.1. The objectives of an empirical research	64
2.2. Methods of an empirical research	65
2.3. Sample of an industrial plants	73
2.4. Representativeness of the sample	76
2.5. Results of an empirical research.....	78
2.5.1. Current state of Industry 4.0 in the sample plants ...	81
2.5.2. Manager's expectations of next Industry 4.0 utilisation....	89
2.6. Summary and discussion	98

3. FACTORS INFLUENCING INDUSTRY 4.0	
IMPLEMENTATION IN THE INDUSTRIAL COMPANIES ...	109
3.1. Managerial factors influencing utilisation of Industry 4.0 ...	114
3.2. Selective systematic factors influencing utilisation of Industry 4.0	118
3.2.1. Factors resulting from production layout.....	119
3.2.2. Factors resulting from content of manufacturing and logistics processes	121
3.2.3. Factors resulting from integration and automation of manufacturing and logistic processes	123
3.3. Factors resulting from requirements of stakeholders...	126
3.4. Summary of factors influencing utilisation of Industry 4.0 ..	131
CONCLUSION	134
